Ad The AutoCAD software is sold in two tiers. Standard (non-student) editions and Professional (student) editions. These versions are available on CD-ROM or through the Internet. AutoCAD also has several discounted

student versions. The standard edition includes a number of preset features such as 2D and 3D drawing tools, dimensions, path tools, placing objects on a model, and text. The standard edition is available on CD-ROM and also over the Internet. The professional version adds

additional features. These include dimensions, tools to import and link images from scanners and digital cameras, eXtensions, and more. The professional version also includes acad.dll, acad.g, acad.py, acad.lp, acad.dll.log, acad.text, acad.lib, acad.lic, acad.smc, acad.bin, acad.shp,

acad.dll.svg, acad.qc, acad.hqx, acad.xld, and acad.lid. The professional version is available on CD-ROM and through the Internet. The software is available for Windows, Mac, and Linux. There is also a free AutoCAD trial version available, which allows the user to edit two

documents. You can sign up for a free trial here. There is also a web-based version of AutoCAD. Ad Steps One of the most popular features of AutoCAD is the ability to link images to your drawings. This allows you to import images from scanners and digital cameras directly into your

AutoCAD drawings. This feature is sometimes referred to as "photo merge". In order to link an image to your drawing, you must first create a template (file) that the image will link to. Templates are usually created as bitmaps (images) or vector files. The process to link an image to a

drawing is as follows: 1 Open the drawing you want to link the image to. 2 Click the menu in the top left of the screen, then choose the "link" item. This will open the "Link To Drawing" dialog. 3 Click "New" in the drop-down menu. This will open a blank drawing, where the new drawing

will be saved to. 4 Locate the template you created earlier. (If you are using a template saved as

Business Week: Best Practices for
Managing Finances During
COVID-19 Small Business Week
As the COVID-19 crisis
continues, your business may be

facing new challenges in areas such as payroll and finances. As a small business owner, you may be wondering if it's time to seek outside help. Don't panic! We are here to help. COVID-19 has made it difficult for small business owners to conduct daily business, and if you don't put

some structure in place, your business may go under. As a small business owner, the last thing you should worry about is how to pay your employees. Doing so is a no-brainer. Now, it's more important than ever to stay on top of your small business finances. This way, you can focus on growing your

business. Here are the best practices for small business owners during the COVID-19 crisis. Read It and Remember It It's important to understand the basic principles of your business's finances. Here are two things to keep in mind as you work to get through this rough time: You are

the only person with access to your finances You can't draw on funds that are not there As a small business owner, you have the ability to run your business from anywhere. That means you can take all the time you need to understand the ins and outs of your finances. That also means

you need to read through your company's financial statements, budget and any legal agreements that may be important. There is no need to feel overwhelmed by this, because it's actually quite easy. All it takes is a few hours a week to stay current. If you already have a financial manager,

don't hesitate to ask for help. All too often, a financial manager can put all the pieces together. Keep Your Balance Sheet as Accurate
